REMARKS		
25X1		

- The construction work at the RECHLIN (N 51/U 33) airfield was completed. All cantonment buildings and taxiways had also been built. The quarters were apparently occupied by Soviet Air Force units since air force soldiers and motor vehicles were observed in NEUSTRELITZ (N 54/U 54) for some time. The construction work had been done by the FUERSTENBERG Bau Union Firm whose workers were then transferred to the TROLLERHAGEN (N 54/U 67) airfield.

Comment:

The construction of taxiways is reported for the first time. the airfield was used by an air unit during the air force maneuvers. It is not known whether the field is now occupied by an air unit. The transfer of the construction workers to the NEUBRANDENBURG-TROLLERHAGEN airfield is considered credible since construction work is reportedly being done there.
